

concrete imaging **Conquest**™

by Sensors & Software Inc.

subsurface imaging solutions

What's in the concrete?

Conquest gives you the answers on-site

- Locate post tension cables
- Map rebar
- Delineate conduits
- Discover voids
- Estimate cover depth
- Measure slab thickness

Retrofitting or renovating an existing structure?
How confident are you that you know the existing construction?

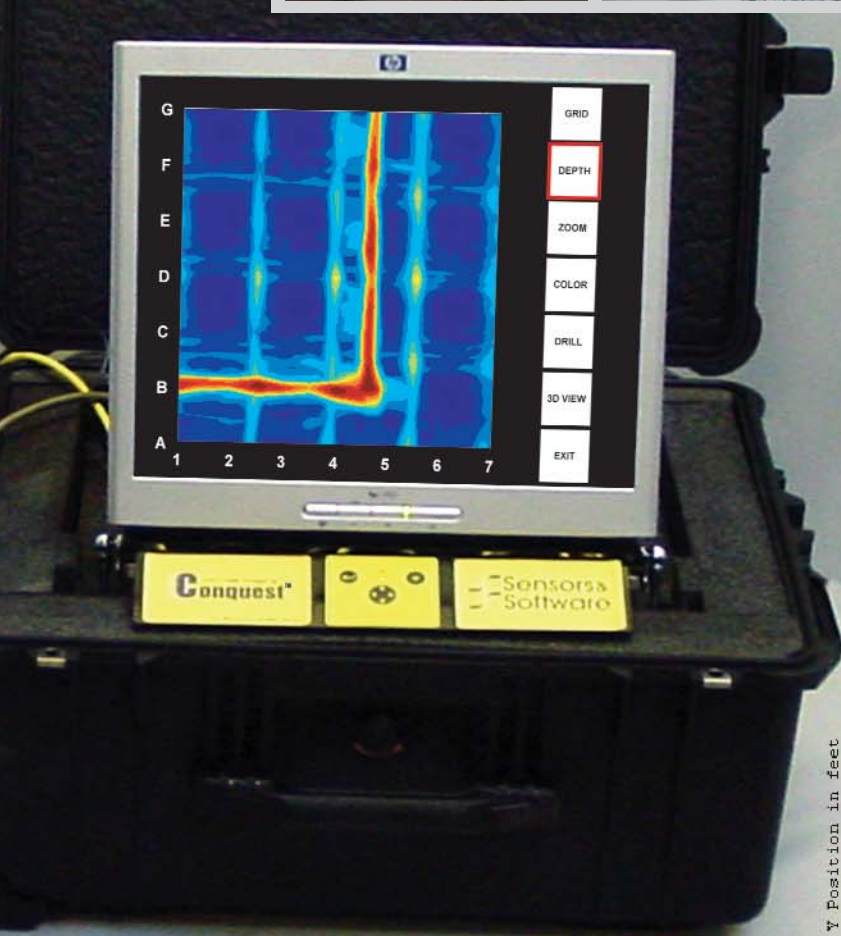

Your new designs critically depend on knowledge of the existing structure.

Use Conquest to confirm records and construction practice.

One hit, while cutting or coring can cost you future work, project delays, and much more.

Conquest can reduce the chance of hits by up to 90%.

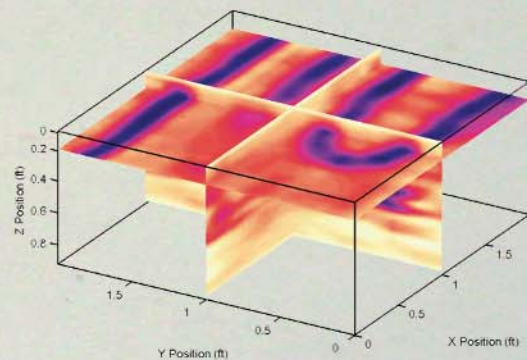

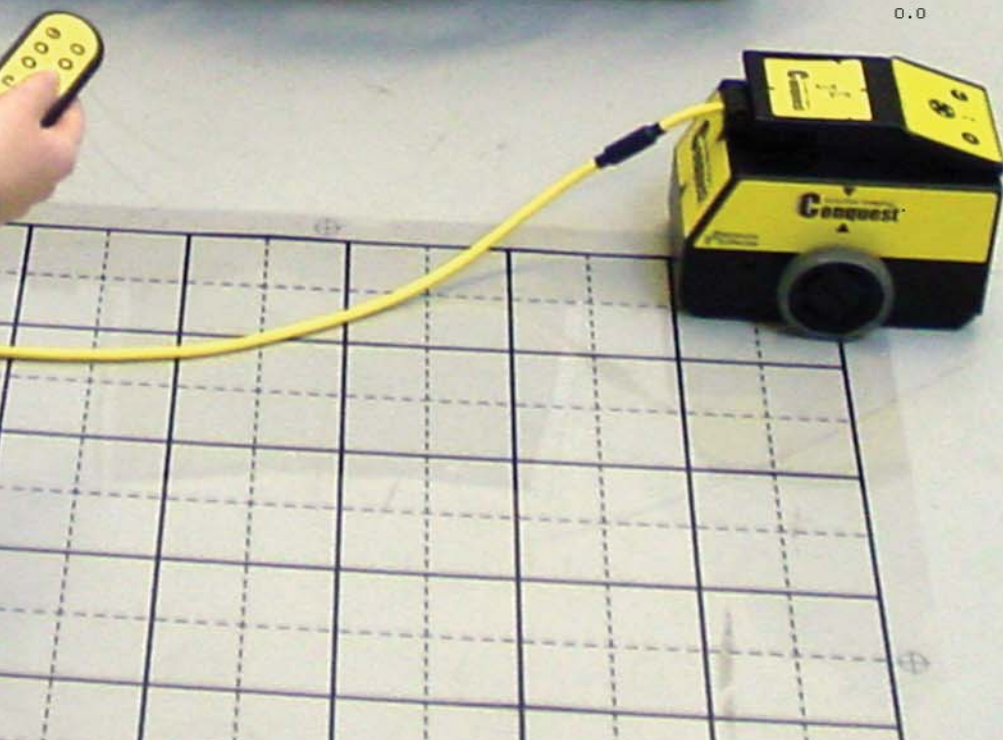

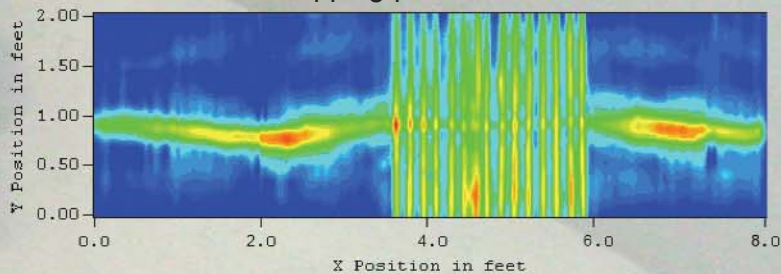

The Conquest Advantage

- Easy to use
- Rapid on-site results
- Remote control operation
- One person operation
- Light and compact
- Cutting edge sensor technology
- Real-time drill locator
- Removable flash memory

For verification, documentation and reporting use ConquestView or Conquest3D software

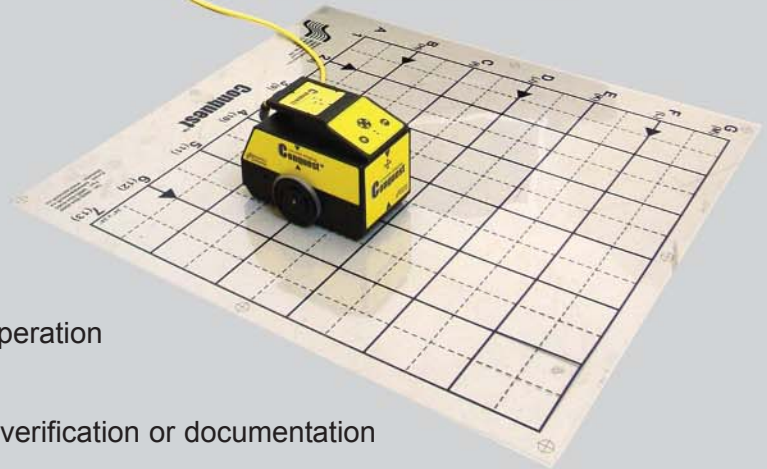

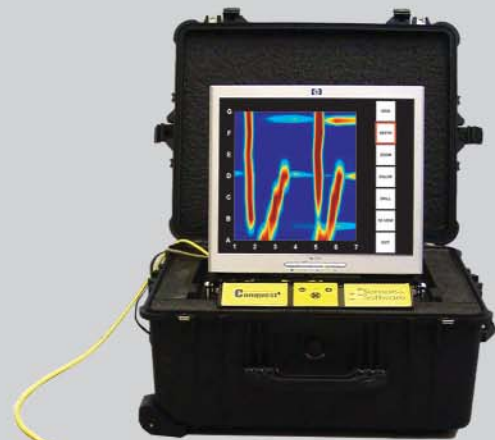

Mapping post tension cable and rebar

Locating radiant heating tubes

concrete imaging **Conquest**TM

by Sensors & Software Inc.

The Conquest checklist:

- ✓ **Speed** Standard imaging in under 2 minutes
- ✓ **Light weight** Sensor head < 1.9 lb (0.9 kg)
Total system < 46.5 lb (21.1 kg)
- ✓ **Ease of use** Simple menu-driven operation
3 control panels for direct or remote operation
Wireless remote
- ✓ **Data storage** Industry standard removable flash for verification or documentation
- ✓ **Training** Built-in interactive training course and self-help
- ✓ **Technology** World recognized Sensors & Software GPR technology
- ✓ **Positioning** Integrated slim line wheel odometer
Use metric (mm) or imperial (inches) units
- ✓ **Support** Customer service is our priority - ask our customers!
- ✓ **Power** Power from A/C mains or 12 V battery units
- ✓ **Flexibility** Light sensor
Flexible cable
Ergonomic design for hard-to-access areas
- ✓ **Safety** Satisfies regulatory standards world-wide for UWB devices
